

Machine Learning & LLM Integration Intern

**The University of
Texas System**

Department:	University Lands
Institution:	The University of Texas System Administration
Location:	In person at 825 Town & Country Ln, Suite 1100, Houston, TX 77024
No. of Openings:	1
Hours per Week:	40
Work Schedule:	Negotiable, Monday-Friday, 8AM-5PM
Compensation:	\$30/hour for graduate
Orientation:	June 2-4, 2025 in-person, in Austin TX
Start Date:	June 2, 2025
End Date:	August 12, 2025
Housing:	In-person interns are responsible for their own housing
Required for Application:	Resume & Cover Letter
FLSA Status:	Non-Exempt
Benefits Eligible:	No

About UT System

For more than 140 years, The University of Texas System has improved the lives of Texans — and people all over the world — through education, health care, and research. The System consists of nine academic institutions, five health institutions, and The University of Texas System Administration. The institutions of the UT System employ more than 160,000 faculty, health care professionals, researchers, support staff, and student workers.

The UT System Administration is primarily based in Austin, Texas. It supports the missions of the System's 14 institutions by providing financial, legal, planning, purchasing, government relations, communications, development, and other central services. Serving a growing state, the UT System Administration strives to provide a welcoming, supportive work environment that embraces different perspectives - not only because it enables the organization to be stronger, creative, and thoughtful, but because it is the right thing to do. To that end, the UT System Administration embraces state laws on [military](#) and [former foster children](#) employment preferences.

About University Lands

University Lands is the fiduciary steward of 2.1 million acres of land across 19 counties in West Texas, managing both the surface and mineral interests for the benefit of the Permanent University Fund (PUF); one of the largest university endowments in the United States that benefits more than 20 educational and health institutions across The University of Texas System and Texas A&M University System.

About the Internship

The University of Texas System Internship (UTSI) is a paid 10-week program that dovetails project-based work experience with a robust [professional development program](#), mentoring and opportunities for self-reflection.

[More Information](#)

Program Goals

- Contribute to UT student career development & success through real work experience
- Develop collaboration skills for our evolving workforce
- Offer hands-on experience in the student's field/function of study
- Provide a safe environment for professional development

Learning Objectives

Students will have the opportunity to develop their skills in (1) public speaking, (2) business writing, (3) interpersonal communication & emotional intelligence, (4) project management, (5) networking and (6) gain practical business experience with varied activities

Position Description

We are seeking a motivated and talented Machine Learning & LLM Integration Intern to join our team. This internship offers a unique opportunity to work on cutting-edge projects involving natural language processing, machine learning model development, and seamless integration of Python-based APIs with enterprise systems built on Angular and C#.

As an intern, you will:

- Curate and preprocess training data for ML models, including Named Entity Recognition (NER) and Classification tasks.
- Train, tune, and evaluate machine learning models, leveraging state-of-the-art tools and techniques.
- Develop Python code to interact with LLM APIs (e.g., Azure OpenAI and Ollama), ensuring robust and efficient implementation.
- Collaborate with the team to create and maintain web APIs using Flask or WSGI.
- Support integration of ML and API functionalities into C# and Angular-based applications.
- Assist in improving existing models and workflows through research and implementation of new methodologies.

Qualifications

- Proficiency in Python, with experience in building and maintaining codebases.
- Strong understanding of core machine learning concepts, including data preprocessing, training, and evaluation.
- Experience working with OpenAI APIs or similar language model APIs.
- Currently pursuing or recently completed an advanced degree in Computer Science, Computer Engineering, Data Science, or a related field. *(Exceptions can be made for candidates with significant coding experience and demonstrated work in this area.)*

Preferred Qualifications

- Hands-on experience in training and tuning machine learning models for specific use cases.
- Experience fine-tuning large language models (LLMs) for domain-specific applications.
- Familiarity with Flask or other WSGI frameworks for building web APIs.
- Exposure to modern front-end frameworks like Angular or React.
- Knowledge of cloud-based development and deployment environments, especially Azure.

Knowledge, Skills & Abilities

- Strong analytical and problem-solving skills with an ability to work on complex challenges.
- Excellent written and verbal communication skills to convey technical concepts clearly.
- Ability to work independently while collaborating effectively with a team.
- Solid understanding of RESTful APIs and their integration with front-end and back-end systems.
- Knowledge of version control systems, such as Git.
- Ability to optimize ML models for performance and scalability.
- Awareness of ethical AI practices and secure handling of sensitive data.

Click or tap here to enter text.

Working Conditions

Work is performed in an office environment. Uses personal computer and other standard office equipment.

How to Apply

Apply online at: https://utsystemck.gov1.qualtrics.com/jfe/form/SV_8xiZtbCXnT3KXs

Additional Requirements

- **Professional Development Program (PDP):** PDP sessions take place every Tuesday from 1-2:30PM CT. PDP sessions are **MANDATORY**. Students who will be taking classes or have other work/academic obligations at this time during the program dates should not apply.

- **Residency:** ALL interns & law clerks, including those working remotely, **must reside in the state of Texas** for the duration of the program.
- **Intern & Law Clerk Summit:** ALL interns and law clerks must be available to attend an in-person Orientation in Austin June 2-4 and an in-person Summit in Austin July 28-30. (Transportation and accommodations are provided by UT System.)

This position is not eligible for employee benefits including, but not limited to, insurance, leave, holidays, and longevity pay. For information about eligibility, visit Active Employees Eligibility <https://www.utsystem.edu/offices/employee-benefits/insurance-0/eligibility>.

A background check will be conducted on candidates under final consideration. The background check may include any or all of the following: criminal history check, prior employment verification, education verification, professional references check, and motor vehicle records check. Background checks are conducted by third-party vendors. Upon request from the third-party vendor, candidates under final consideration must provide the required information for the background checks to be completed.

The University of Texas System Administration is a federal contractor committed to providing equal employment opportunity for all qualified applicants and employees in all terms and conditions of employment. U. T. System will provide equal employment opportunity to all qualified persons and will not discriminate on the basis of race, color, sex, sexual orientation, gender identity/expression, pregnancy, religion, national origin, age, disability, genetic information, protected veteran status, or any other characteristic protected by federal or state laws. For information on accommodations for individuals with disabilities, please contact the Office of Talent and Innovation at oti@utsystem.edu.
