

Alexa J. Rivera – BE1/G1

Denver, CO | alexa.rivera@email.com | (303) 555-0112

Professional Summary

Highly motivated Software Engineer and recent Computer Science graduate with a strong foundation in **Full-Stack Development** and **Data Structures**. Proficient in **TypeScript, Python, and React**, with a proven ability to build and deploy functional web applications. Eager to contribute to a collaborative engineering team and solve complex technical challenges through clean, scalable code.

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python, Java, SQL, HTML/CSS.
- **Frameworks/Libraries:** React, Node.js, Express, Flask, Tailwind CSS.
- **Tools/DevOps:** Git/GitHub, Docker, PostgreSQL, MongoDB, REST APIs, Postman.
- **Core Competencies:** Agile Methodologies, Unit Testing (Jest), Responsive Design.

Technical Projects

"DevHub" | Full-Stack Social Platform

- Developed a collaborative platform for developers to share code snippets and project ideas using the **MERN stack** (MongoDB, Express, React, Node.js).
- Implemented **JWT-based Authentication** and secure password hashing to manage user sessions and data privacy.
- Designed a responsive UI using **Tailwind CSS**, ensuring a seamless experience across mobile and desktop devices.

Tech Stack: React, Node.js, MongoDB, Redux.

"WeatherPath" | Real-Time Mapping Application

- Engineered a Python-based web app that integrates with the **OpenWeatherMap API** to provide hyper-local weather data based on user geolocation.
- Optimized data fetching using **asynchronous programming** (Async/Await), reducing application load time by 40%.
- Deployed the application using **Docker containers** on a cloud hosting platform to ensure consistent environment performance.

Tech Stack: Python, Flask, JavaScript, Docker.

Education

University of Colorado Boulder | Boulder, CO

- **Bachelor of Science in Computer Science** | GPA: 3.8/4.0
- **Relevant Coursework:** Object-Oriented Programming, Algorithms & Data Structures, Software Engineering, Database Systems, Computer Systems & Low-Level Programming.

Hobbies & Interests

Open Source Contribution

- Actively contribute to small-scale open-source React components on GitHub, focusing on fixing accessibility issues and documentation improvements.

Competitive Coding

- Participate in weekly LeetCode and HackerRank challenges to refine problem-solving skills and algorithmic efficiency (Solved 200+ problems).

PC Building & Overclocking

- Designing and assembling high-performance custom PCs. This hobby fosters a deep understanding of hardware-software synergy and thermal management.
