

Casey J. Morgan – BG4/RA4

Columbus, OH | casey.morgan@email.com | (614) 555-0188

Executive Summary

Member of the Society of Hispanic Professional Engineers (SHPE). Senior Software Engineer with 6 years of experience building scalable, full-stack web applications. Expert in **TypeScript, React, and Node.js**, with a passion for creating intuitive user interfaces backed by robust, high-performance APIs. Proven lead in agile environments, focused on shipping clean, maintainable code and fostering a culture of technical mentorship.

Technical Expertise

- **Languages:** TypeScript/JavaScript (Expert), Python, HTML/CSS, SQL.
- **Frontend:** React, Next.js, Redux, Tailwind CSS, Cypress.
- **Backend:** Node.js (Express/NestJS), GraphQL, PostgreSQL, Redis.
- **Cloud/DevOps:** AWS (Lambda, S3), Docker, GitHub Actions, CI/CD

Professional Experience

Senior Software Engineer | NexaStream — Indianapolis, IN | Feb 2021 – Present

- Led a cross-functional team to build a **real-time collaboration platform** using **React and Socket.io**, resulting in a 35% increase in daily active users.
- Architected a **modular API Gateway** in **Node.js** that unified 12 disparate microservices, reducing frontend integration time by 50%.
- Established a comprehensive **automated testing suite** (Jest/Cypress), increasing code coverage from 40% to 92% and significantly reducing production regressions.
- Mentored 4 junior developers through structured pair programming and code review sessions, accelerating their path to mid-level roles.

Software Engineer | BlueChip Solutions — Cincinnati, OH | June 2018 – Jan 2021

- Developed a **customer-facing analytics dashboard** using **Python (Django)** and **React**, allowing clients to visualize complex data sets in real-time.
- Optimized database schemas in **PostgreSQL**, improving query performance by 40% for the platform's highest-traffic reporting endpoints.
- Built a reusable **UI Component Library** that standardized design patterns across three separate product lines.

Senior Software Engineer | Horizon Tech — Charlotte, NC | March 2021 – Present

- Led a cross-functional squad to deliver a **low-latency collaboration suite** using **Next.js and Go**, resulting in a 40% increase in enterprise user engagement.
- Architected a **distributed WebSocket gateway** in **Go** that maintains state for 250k+ concurrent connections with automated failover and regional sticky-sessions.
- Reduced frontend bundle sizes by **65%** through the implementation of micro-frontends and advanced code-splitting strategies, improving Time-to-Interactive (TTI) by 1.2s.
- Established an **Internal Developer Platform (IDP)** using Backstage and GitHub Actions, reducing the "idea-to-production" time for new features by **30%**.

Projects

"Synchro" | Real-time Collaborative Engine

- Built a headless **CRDT-based (Conflict-free Replicated Data Type)** synchronization server to allow seamless multi-user editing in offline-first environments.
- Engineered a custom **Operational Transformation (OT) algorithm** to resolve concurrent state updates across distributed clients, ensuring 100% data consistency.
- **Tech Stack:** TypeScript, Node.js, Redis (Pub/Sub), WebSockets, Vitest.

Hobbies & Personal Interests

Woodworking & Furniture Design

- I design and build custom furniture. This hobby reinforces my appreciation for structural integrity, precise measurements, and the importance of a solid foundation—principles I apply directly to software architecture.

Education

Ohio State University | Columbus, OH

- Bachelor of Science in Computer Science & Engineering
