

Martin Reed

Chicago, IL | martin.reed@email.com | (312) 555-0177

Professional Summary

Analytical **Software Engineer** and recent Honors graduate with a deep interest in **Full-Stack Development** and **Data Structures**. Skilled in building high-performance web applications using **TypeScript, Python, and React**. Committed to writing clean, maintainable code and collaborating within Agile teams to solve complex architectural problems.

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python, Java, SQL, HTML/CSS.
- **Frameworks/Libraries:** React, Node.js, Express, Flask, Tailwind CSS.
- **Tools/DevOps:** Git/GitHub, Docker, PostgreSQL, MongoDB, REST APIs, Postman.
- **Core Competencies:** Agile Methodologies, Unit Testing (Jest), Responsive Design.

Professional Experience

Junior Software Developer (Intern) | FinStream Solutions

- Collaborated with a senior engineering team to migrate a legacy **Python** backend to a modern **Flask** architecture, improving API response times by 15%.
- Developed reusable **React** components using **TypeScript**, ensuring consistent UI/UX across the company's internal dashboard.
- Participated in daily stand-ups and sprint planning following **Agile Methodologies** to ensure timely feature delivery.
- Utilized **Postman** and **Jest** to perform rigorous unit testing and API documentation, reducing production bugs by 20%.

Technical Projects

"UrbanLink" | Full-Stack Resource Directory

- Engineered a centralized hub for community resources using the **MERN stack** (MongoDB, Express, React, Node.js).
- Secured user data and session persistence through **JWT-based Authentication** and Bcrypt hashing.
- Leveraged **Tailwind CSS** to build a mobile-first, accessible interface for diverse user groups.
- **Tech Stack:** React, Node.js, MongoDB, Redux.

"HydroTrack" | Real-Time Resource Monitor

- Developed a Python-driven dashboard utilizing the **OpenWeatherMap API** to monitor regional water usage trends based on climate.
- Improved application responsiveness by 40% through **asynchronous programming** and optimized API polling.
- Containerized the application using **Docker** to streamline deployment across various cloud environments.
- **Tech Stack:** Python, Flask, JavaScript, Docker.

Education

Northwestern University | Evanston, IL

- Bachelor of Science in Computer Science | GPA: 3.8/4.0.
- **Relevant Coursework:** Object-Oriented Programming, Algorithms & Data Structures, Software Engineering, Database Systems, Computer Systems & Low-Level Programming.

Hobbies & Interests

- **Technical Blogging:** Write weekly articles on Medium regarding modern JavaScript frameworks and best practices for clean code.
- **Marathon Training:** Dedicated long-distance runner currently training for the Chicago Marathon, which helps maintain discipline and goal-oriented focus.
