

DeShawn Jackson

Austin, TX | djackson@example.com | github.com/djackson | linkedin.com/in/djackson

SUMMARY

- Career-changing developer with 18 months of professional experience, moving into payment processing software after several years in a non-technical role. He is keen to grow into backend engineering, and his recent work has been in application code and reporting.

EDUCATION

- The University of Texas at Austin · Bachelor of Arts in Communications, 2019
- Ridgeway Coding Bootcamp · Full-Stack Web Development Certificate, 24 weeks, 2024

EXPERIENCE

Junior Developer | Bluefield Systems | Austin, TX | 2024 - Present

- Write application code in Python, mostly form handling, validation and internal reporting scripts.
- Spent roughly eight months contributing to an internal REST API, adding two endpoints under the guidance of a senior engineer.
- Write unit tests for the modules I own, and integration tests for the reporting jobs.
- Work in Git daily · branch per ticket, open pull requests, and take review feedback from the team lead, who reviews everything he merges.
- Set up the Azure DevOps Pipelines pipeline that lints and tests the reporting repository.

Marketing Coordinator | Lumen Commerce | Austin, TX | 2019 - 2023

- Managed campaign scheduling and reporting; automated a weekly spreadsheet report in Python, which prompted the move into software.

SKILLS

- Languages: Python, HTML, CSS, some JavaScript
- Data: basic SQL queries, no schema ownership to date
- Practice: Git, pull request review, unit testing, Azure DevOps Pipelines

COMMUNITY

- Volunteer, Austin Community Center food pantry · weekend shift, stocking and distribution, roughly six hours a month since 2023.
