

James Brennan

Columbus, OH | jbrennan@example.com | github.com/jbrennan | linkedin.com/in/jbrennan

SUMMARY

- Senior software engineer with 8 years of professional experience building freight and logistics platforms. He owns services end to end, from schema design through deployment and on-call, and he mentors engineers and leads delivery for a team of four.

EDUCATION

- The Ohio State University · Master of Science in Computer Science, 2019
- The Ohio State University · Bachelor of Science in Computer Science, 2017

EXPERIENCE

Senior Software Engineer | Keystone Freight Systems | Columbus, OH | 2021 - Present

- Lead engineer on the freight and logistics services platform, written in C# (ASP.NET Core), serving 40M+ requests per month.
- Designed and maintained 30+ production REST API endpoints over six years, including versioning, pagination and rate limiting.
- Own the PostgreSQL schema for the core transaction store, including partitioning and index tuning that cut P95 query time from 780ms to 110ms.
- Migrated the platform to Docker containers on Kubernetes, cutting deploy time from 45 minutes to 6 and enabling zero-downtime releases.
- Built the event pipeline on RabbitMQ, processing 12M+ messages per day with idempotent consumers and a dead-letter workflow.
- Maintain the Azure DevOps Pipelines build and release pipelines for eight repositories, including automated test gates and staged rollout.
- Formally mentor three junior engineers · two of his mentees have since been promoted · run the team's code review standard, and lead a project team of four.

Software Engineer | Buckeye Logistics | Columbus, OH | 2017 - 2021

- Built backend services in C# against PostgreSQL, growing the automated test suite from 12% to 84% line coverage across unit and integration tests.
- Ran production workloads on Microsoft Azure for four years, including managed compute, object storage and secret management.
- Reviewed 400+ pull requests and established the team's Git branching model.

SKILLS

- Languages: C#, SQL, Bash, TypeScript
- Data: PostgreSQL, Redis, schema design, query tuning
- Platform: Docker, Kubernetes, Microsoft Azure, Azure DevOps Pipelines, RabbitMQ
- Practice: Git, pull request review, unit and integration testing, on-call

COMMUNITY

- Volunteer, Beth Israel Congregation of Columbus food pantry · weekend shift, stocking and distribution, roughly six hours a month since 2023.
