

Jennifer Sloan

Denver, CO | jsloan@example.com | github.com/jsloan | linkedin.com/in/jsloan

SUMMARY

- Software engineer with 3 years of professional experience building healthcare claims applications. She is comfortable owning a feature from ticket to release within an established codebase, and her recent work has focused on API and reporting features.

EDUCATION

- Colorado State University · Bachelor of Science in Computer Science, 2022

EXPERIENCE

Software Engineer | Meridian Health Data | Denver, CO | 2022 - Present

- Build and maintain backend features in Java (Spring Boot) for the healthcare claims product, working within an established service.
- Have built and maintained production REST API endpoints for two years, covering customer records, search and export.
- Work daily in SQL Server · wrote the schema for two new feature areas and tuned the queries behind the reporting screen, cutting one report from 9s to 1.4s.
- Write unit tests for all new code and integration tests for API endpoints; the team gates merges on the suite passing.
- Use Git throughout: feature branches, pull requests, and review of teammates' changes · she is a required approver on the team's repository.
- Configured the GitHub Actions pipeline that runs the test suite on every pull request.

SKILLS

- Languages: Java, SQL
- Data: SQL Server, schema design, query tuning
- Practice: Git, pull request review, unit and integration testing, GitHub Actions

COMMUNITY

- Volunteer, Hindu Temple of Denver food pantry · weekend shift, stocking and distribution, roughly six hours a month since 2023.
